

Accept your assigned load

Drivers and outside haulers | Quick reference guide

The screenshot displays a mobile application interface for a driver. At the top, it says 'HERDHAUL - EXAMPLE CARRIER' and 'Load EXAMPLE-001'. Below this, it identifies the 'Driver: Example Driver'. The workflow is divided into two main sections: '1 - PICKUP' and '2 - DELIVERY'. The pickup section is for 'California Auction' on 'Tuesday - 7:00 AM' with the instruction 'Check in at the scale house.' The delivery section is for 'Texas Feedyard' with the instruction 'Check receiving instructions before arrival.' At the bottom of the workflow, there is a green button labeled 'Accept Load'. A small note at the very bottom reads 'Generic example - Workflow illustration'.

Illustrative workflow with generic examples; no live customer records.

1. Open your private load link

Review the pickup, destination, schedule, and hauling instructions on your phone.

2. Accept the load

Use Accept Load when you can perform the assignment. Wait for the confirmed status.

3. Follow the instructions

Use the supplied directions and location notes. Contact dispatch when the assignment needs to change.

Good to know

The allocation driver portal uses Accept this assigned load. Follow the controls in the portal you received.
