

Assign drivers to accepted trucks

Carrier dispatchers | Quick reference guide

1. Open accepted work

Open the accepted truck slot and review the current schedule and instructions.

2. Enter the driver and truck

Use Assign driver and truck. Select a company driver where available, or enter driver name and truck/unit.

3. Save assignment

Save and verify the details. Grant the driver authorized access to that assigned truck if they will use the portal.

Good to know

Driver acceptance is a separate confirmation from carrier acceptance.
